

## **BPA and Phthalates Concerns**

Recently, some concerns have been raised about the presence of Bisphenol-A (BPA) in children's products, and we would like to assure our customers that **ALL OF ZAK DESIGNS' LICENSED CHILDREN'S MEALTIME PRODUCTS ARE BPA-FREE.** If there is a character on the product, and a Zak Designs logo on the back, then you can be sure that product is BPA-Free.

In addition to being BPA-Free, Zak products also meet all of the new local and national standards regulating the presence of Phthalates in various children's products and child care articles.

Please be assured that we will continue to subject our products to rigorous safety and quality tests and hold them to the highest standards, so that we know that the products we're delivering to your children are unquestionably safe.
