Nothing sets the tone for summer quite like the patriotic palette of red, white and blue. A foundation of updated classic teak furniture along with a smattering of nautical-themed accessories transform this outdoor space into a casual seaside haven perfect for entertaining friends or curling up with a good book. Splashes of cherry red liven up the sitting area, while deep blue tones in the rug, curtain and other accessories anchor this beachy nook in a wash of cool color. A big, round leather-look ottoman adds modern appeal and does double duty as a serving table.

## Ty's Tip

When mixing patterns, pay attention to scale. Complement bold-striped draperies with a houndstooth check or delicate pinstripe on throw pillows.
