

fun + bright Sherbet

yummy gelato

Cold and creamy, smooth and flavorful, gelato is definitely not your ordinary "cold" treat. Gelato is an Italian frozen dessert made from milk and sugar and combined with ingredients, such as nuts, fruits, and liquors.

What makes gelato different from the typical ice cream treat found in the USA, is that it does not contain any cream. Gelato needs to be stored in a freezer that is set to a lower temperature than regular ice cream, generally 12 degrees lower.

Since gelato is denser than normal ice cream, the flavor is more powerful and generally served in smaller portions.

OUR favorite ways to eat ice cream

- Ice cream sundae
- Milk shakes
- In a crunchy cone
- Topped with hard shell chocolate sauce
- Banana split
- Deep fried
- Topped with rainbow sprinkles

What is sherbet? Is it an icy? Is it ice cream made with fruit? Sherbet is actually, by definition, a frozen dessert made primarily of fruit juice, sugar, and water, and also containing milk, egg white, or gelatin.

Easy & clean

Eating ice cream has never been so much fun for both Mom and kids! With the Dripstick, hands and clothes will be kept clean and kids will love the bright colors and fun ice cream accessory. And if that isn't enough, it holds either an ice cream cone or a Popsicle stick. Just flip it over... and viola! Perfect for parties, road trips or just lazy days of summer. (www.dripstik.com)

Bright and Colorful

These Wave Ice Cream Bowls and spoons by ZAK are the perfect serving bowls for ice cream sundaes. BPA, PVC, phthalate, and lead safe, these ice cream bowls nestle together for perfect serving pieces. Bowls and spoons sold separately. (www.zak.com)
